R **4,490,617**

Stock Value:

R **180,000**

Yearly Net Profit :

R **722,092**

Business Report

Fully describe the business's activities?

This business specialises in punching, shearing and cropping equipment – the manufacture thereof, the stockists thereof and the final distribution thereof. The products manufactured are used in the structural steel, engineering and sheet metal industries.

They also manufacture hand operated punching machines, hand operated shearing machines and are distributors / agents for a Japanese manufactured portable hydraulic punching machine.

Their products are manufactured by a staff complement of 8 people utilizing 16 machines which include 6 CNC (computer numerically controlled) machines. All products are manufactured in house – from the initial raw material stage through machining and heat treatment, through to the finished product.

Punches and dies are specifically utilised to punch holes in steel as a faster, less expensive alternative to drilling. Cropping, shearing and notching blades manufactured are used to crop (cut) and shear angle iron, flat bar, round bar, square bar and sheet metal. These tools fit into a machine known as a “Universal Ironworker” or more commonly, as a punching and cropping machine.

They are the only manufacturers and stockist of a range of popular punches, dies and blades in South Africa. This has been achieved over the past 40+ years by providing excellent service and quick turnaround times.

How does the business operate on a daily basis?

Operates as a sales entity & manufacturing entity Monday to Friday. Refer to Business Activities question

What Advertising/Marketing is carried out?

google / internet

What competition exists?

Little, if any
