## Fully describe the business's activities?

-The endermologie® treatment technique offers a natural, painless alternative: Mechanical cellular stimulation wakes up our sleeping skin cells for intense sensations and more visible, faster and longer-lasting results. non-invasive treatments that help boost metabolism, tone the body, and improve circulation, making them ideal for women over 30 dealing with slow metabolism and stubborn fat.

-Cryolipolysis, commonly referred to as fat freezing, is a nonsurgical fat reduction procedure that uses cold temperature to reduce fat deposits in certain areas of the body. The procedure is designed to reduce localized fat deposits or bulges that do not respond to diet and exercise.

Ultrasonic Cavitation: This procedure involves applying pressure on fat cells through ultrasonic vibrations. The pressure is high enough to make the fat cells break down into a liquid form. The body can then get rid of it as waste through your urine. The broken-down fat cells go from the body to the liver, where they are excreted as waste

Vacuum Therapy: aids in contouring and improving skin flexibility. Experience effective results with no side effects, lymphatic detoxification, which promotes blood circulation and promotes detoxification of the digestive system.

crystal microdermabrasion, the most natural way to regain the youthful appearance of skin without chemicals, lasers or surgery, or extended periods of irritation and redness.

Crystal microdermabrasion skin care is ideal for anyone who wants to improve skin appearance and reverse the signs of aging, most effective method available for wrinkle reduction, skin exfoliation, and pigment correction

-Diode Laser Machine is engineered to deliver optimal results in hair removal and tattoo removal
