Business Report

Background and History

The developer and owner of this sport vehicle has been involved in the development of this vehicle from 1984

He stopped production a few years ago and travelled the world to look at the different designs, engines, solutions regarding the chassis/handling/outlay of the interior etc and came back to SA to finalize the designs

He has used own funding to date for the design/sourcing of parts/looking at accident possibilities and made provision for that via protection designs/chassis changes /riding comfort etc

There are various drawings/research documents/business plans etc available to confirm the huge feasibility in the introduction of this sport vehicle in overseas countries like the USA/Middle East/UK/Asia/Australia where these types of sport vehicles are very popular

These new designs are an improvement of nearly 300% on the old designs (this bold statement can be proven)

This unique manufacturing opportunity is now ready for production including certainty of the supply of parts thus a turnkey business
