Business Report

Background and History

A unique opportunity to join an experienced partner in the agri sector to import and distribute/sell agricultural products/equipment to South Africa and into Africa

A collaborative invest model has been developed to join an industry expert to invest in agri tech precision equipment which cannot be manufactured in SA at a cost compared to importing equipment

The equipment imported is focused on the sunflower/corn/vineyard/soybeans farms and the suppliers overseas can consistently supply a variety of equipment

Besides the said equipment, striptills (and no striptills) can be supplied to the agri sector, plus a software app designed for precision equipment

The proposal is that the ownership of the equipment will remain the ownership of the investor until it is sold, thus securing the investment

The equipment will be stored in a safe warehouse until sold and then the profits will be divided between the two directors/shareholders

The party requiring the investment has vast experience in the agri sector and well known and has had successful marketing initiatives at shows like Nampo etc

Full particulars and proposals are available for an interested investor

Products and Services

Various products/equipment aimed at the corn/sunflower/vineyards/soybeans etc-

Financials and Forecasts

R5 million needed to start the import of equipment as per above explanation

Reason for Investment Offer

Need capital to start importing agri equipment

Investment Opportunity

To invest in an agri equipment supply business selling imported agri equipment
