About the Business:

Lifestyle Mobility Franchise Opportunity

This lifestyle mobility franchise opportunity operates within a fast-growing rental market. While the brand's main offices are based in the Garden Route, Western-Cape, South Africa, this franchise

opportunity is not limited to that region. Subject to franchisor approval and market availability, new franchise territories can be established nationwide wherever there is clear demand for flexible two-wheel mobility solutions. As the new franchisee, you will take ownership of a structured, income-generating operation that provides reliable two-wheel transport solutions to delivery drivers, commuters, and tourists.

The lifestyle mobility franchise opportunity is built around a simple yet powerful model: flexible rentals with maximum convenience. Customers can collect and return units from the main office, and within a 25 km radius, vehicles are delivered directly to them. This pick-up and drop-off system provides a strong competitive advantage, making the service highly attractive to gig-economy drivers who rely on daily transport to earn an income, commuters seeking affordable mobility, and visitors needing short-term transport.

For delivery riders, the rental model removes the burden of large upfront purchases and ongoing maintenance risks. For commuters, it offers a cost-effective alternative to traditional transport. For tourists, it provides freedom and accessibility without long-term commitment. This creates consistent demand across multiple customer segments rather than relying on a single market.

By investing in this business for sale, you become part of a recognised network with established branding, operational systems, and ongoing support. The foundation is already in place — your role is to step in as the owner-operator (or strategic manager) and grow the client base within your territory, leveraging the increasing demand for flexible and affordable mobility solutions.

This is more than a business purchase — it is an entry into a scalable, service-driven operation positioned within a sector that continues to expand year after year.

Included in the asking price are 7x scooters, 6x helmets, 6 x carrier boxes and on-road licenses to the value of R218 865.
