Custom Built Diesel-Powered Industrial Vacuum Recovery System

Description / Primary Use

Diesel-powered industrial vacuum recovery and cyclone separation system designed for heavy-duty industrial cleaning, dust extraction and material recovery. Suitable for the collection and transfer of dust, dry bulk materials, sludge and industrial waste in mining, manufacturing, engineering, agricultural and processing environments.

Aldes Auctions, represented by a**uctioneer Peet Brits**, presents the **Highveld Engine Rebuilders Industrial Vacuum Auction**, taking place on **25 June 2026 at 11:00 at 10 Chopin Street, Klarinet, Witbank.** This focused industrial sale offers serious buyers the opportunity to acquire a high-quality, purpose-built piece of heavy-duty equipment sourced directly from an established engineering operation in the heart of the Highveld.

The headline asset on offer is a **diesel-powered Industrial Vacuum Recovery and Cyclone Separation System,** engineered for demanding industrial applications across mining, manufacturing, engineering, agricultural and processing environments. This robust unit is capable of handling dust, dry bulk materials, sludge and industrial waste, making it an exceptionally versatile solution for operations requiring reliable on-site cleaning, material recovery and dust extraction capabilities. Its cyclone separation technology and diesel power source make it ideal for use in remote or off-grid industrial settings where performance and mobility are essential.

Do not miss this opportunity to secure a premium piece of industrial equipment at auction. We encourage all interested buyers to register to bid ahead of the sale, arrange a viewing to inspect the asset in person, and contact Aides Auctions directly for any additional information or enquiries.

Visit the Aides Auctions website or reach out to Peet Brits and the team to ensure you are ready to participate on auction day.
